SOUTHCO **WIRELESS ACCESS CONTROL PLATFORM**

SEAMLESS ACCESS, ANYTIME, ANYWHERE

southco® | **keypanion**®

Southco's wireless access control platform revolutionizes how you manage industrial equipment and critical infrastructure.

With our system, you can use your smartphone or smart device to wirelessly access your equipment from anywhere, at any time.

Manage multiple devices and users effortlessly through a web browser, offering scalability as your needs grow.

Effortless IoT Connectivity

Our platform provides a simple, plug-and-play solution, enabling you to monitor and control equipment access with zero installation hassle. Achieve connectivity to the internet of things instantly without additional costs or time investments.

Key Benefits

• **Eliminate Physical Keys:** Say goodbye to traditional key costs. Manage equipment access digitally through your phone or web browser.

• **Easy Wireless Access Control:** Seamlessly manage who can unlock your equipment and when with a touch of a button.

• **Scalable Access Management:** Our platform grows with your operation, letting you capture data with a user-friendly web portal.

One Plug-and-Play Solution

Southco® Electromechanical Lock

Various electromechanical locks available

Southco Bluetooth® Controller

Wired and battery-powered controllers available

Keypanion Access Platform

The Keypanion App and Web Portal

OR

Southco SDK

Software tool kit for Customer Own App/ Platform

How It Works

The system comprises hardware with Bluetooth® technology designed to securely lock or latch doors, lids and panels. Paired with our Keypanion cloud-based access management platform, you can create and share digital keys securely with users around the world. The Keypanion App simplifies access management, while the web portal offers enhanced functionality for larger-scale equipment networks.

Maximize Efficiency With The Keypanion Web Portal

The Keypanion web portal is a powerful addition to Southco's system, offering a cost- effective IoT upgrade. Here's what it can do:

- **Manage Access & Admin Rights: Control** access and administrative rights for multiple devices from anywhere, anytime.

- **Efficient Group Management: Organize users** and devices into groups for streamlined management.

- **Compliance & Efficiency: Grant or deny** access in real-time to ensure compliance and improve efficiency.

- **Enhanced Security:** Assign and revoke admin rights to bolster security and maintenance protocols.

- **Data-Driven Decisions: Capture and export** device access data to inform business decisions and quality control plans.

- **Event-Based Alerts: Receive timely** notifications on unauthorized equipment access or voltage levels.

Maximize your operational efficiency with Southco's wireless access control system. Visit the link below to get started.
