## Concealed hinge

## SUPER-technopolymer

## MATERIAL

Glass-fibre reinforced polyamide based (PA) SUPER-technopolymer, black colour, matte finish.

## ROTATING PIN

AISI 304 stainless steel.

## STANDARD EXECUTIONS

Pass-through holes for mounting using studs with nuts, or cylinder head screws with washer UNI 6592.

## FEATURES AND APPLICATIONS

Hinge to be used with doors and frames of boxed structures in folded sheet metal.
Rings can be applied to the door and frame to prevent the entry of dust and foreign bodies.

## ROTATION ANGLE (APPROXIMATE VALUE)

Max $180^{\circ}\left(-90^{\circ}\right.$ and $+90^{\circ}$ being $0^{\circ}$ the condition where the two interconnected surfaces are on the same plane).
Do not exceed the rotation angle limit so as not to prejudice the hinge mechanical performance.

| Resistance tests |  |  |  |  |  |  |  |  |  |  |  |

The maximum working loads are the loads which lead to a deformation of 2 mm of a single hinge.
