

## Retaining cables

### Polyethylene and stainless steel

#### CABLE

High-modulus polyethylene (HMWPE), black.

#### STANDARD EXECUTIONS

AISI 304 stainless steel fixing plate.

NERINOX treated stainless steel ring with two coils.

- **CV-T-2A**: cable with two clamping rings.
- **CV-T-A-P**: cable with one ring and one clamping plate.
- **CV-T-2P**: cable with two clamping plates.
- **CV-T**: cable without rings and without plates.
- **CV-T-P**: cable without rings and with one plates.

#### FEATURES AND APPLICATIONS

CV-T cables are light yet remarkably tough.

They are mainly used in combination with the different types of self-locking pins or in cases where you want to make small components or tools unmissable so that they are always available and at hand.

In particular, they can be used in place of the CT-S ball chain, when a particular tear resistance is required.

#### CV-T-2A

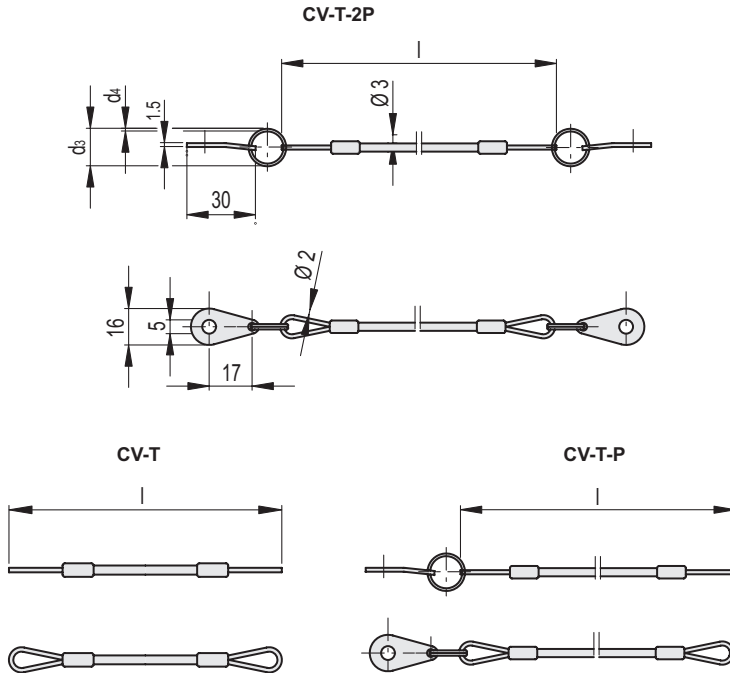

Code	Description	d1	d2	l	Max. static load [N]	⚖️
76201	CV-T-2A-18-150	18	1.3	150	160	7
76202	CV-T-2A-24-150	24	1.5	150	160	8
76203	CV-T-2A-30-150	30	1.8	150	180	9
76206	CV-T-2A-18-200	18	1.3	200	160	9
76207	CV-T-2A-24-200	24	1.5	200	160	10
76208	CV-T-2A-30-200	30	1.8	200	180	11
