

Adjustable Stainless Steel- Hand levers

electropolished

SPECIFICATION

Types

- Type **AS**: with external hexagon
- Type **IS**: with internal hexalobular

Handle

Stainless Steel

Precision casting

- Stainless Steel AISI CF-8
- electropolished

Version with threaded insert

Threaded bush

Stainless Steel AISI 303

Retaining screw

Stainless Steel AISI 303

Spring

Stainless Steel AISI 301

Version with threaded stud

Threaded stud

Stainless Steel AISI 303

Retaining screw

Stainless Steel AISI 303

Spring

Stainless Steel AISI 301

INFORMATION

Adjustable hand levers GN 300.6 with full Stainless Steel-Handle, correspond to applications where „agressive“ surrounding conditions are given, or where stainless steel materials are prescribed such as in food processing or chemical industry.

Retaining screws with hexagon head (Type AS) comply with the requirement "prevents water from accumulating".

Adjustable hand levers have proved to be ideal whenever parts have to be clamped in a confined space or in a particular lever position. The centre insert is connected to the lever via serrations which can easily be disengaged.

Pulling the lever, disengages the serrations and allowing it to be swivelled to the ideal clamping position. On releasing the lever the serrations automatically re-engage.

TECHNICAL INFORMATION

- Stainless Steel characteristics (see page A26)

*Complete with types of the Hand levers (AS or IS)

AS **IS**
