Edge handles

SPECIFICATION

Tube extrusion Aluminium

End caps Zinc die casting

Tube extrusion / End caps plastic coated black, RAL 9005, textured finish SW anodized, natural color EL

Countersunk screws self tapping, with internal hexalobular black, zinc plated

INFORMATION

GN 481 edge handles are particularly compact and are used, for example, on the side of monitor housings as a handling aid or generally to protect the edges of housings.

Tolerance compensation of 1 mm per end cap simplifies installation. The two end caps are mounted to the handle profile with self-tapping countersunk screws so they can be screwed back on after adjusting the length of the handle without requiring readjustment. This allows the length of the housing to be adapted to any desired size.

ACCESSORY

Four DIN 7500-1 countersunk screws are included.

ON REQUEST

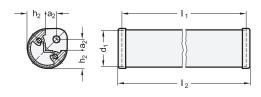

Tube extrusion anodized, natural colour End caps, plastic coated silver, textured finish

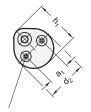

MOUNTING INFORMATION

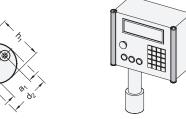

In order to allign the edge handle with the-edge of the cabinet (tolerance l1 + 2 mm), the end caps should, to start with, only be loosely fitted

The mounting is carried out in two steps as follows:

- Fit the end caps firmly to the cabinet.
- Fix the extrusion axially by using the countersunk screws.

Countersunk screw DIN 7500-1, Type M **GN 481**
