

# GN 817.2

Indexing plungers

## technical informations

**Threaded body**  
Black-oxide steel.

## Plunger

Hardened ground steel. Suggested matching hole in H7 tolerance.

## Locking nut

Black-oxide steel.

## Knurled knob

High impact strength polyamide based (PA) technopolymer, black colour, matte finish. Resistant to solvents, oils, greases and other chemical agents.

## Standard executions available

- Type B: without rest position, without locknut.

- Type BK: with rest position, without locknut ISO 8675.
- Type C: with rest position, without locknut.
- Type CK: with rest position, with locknut ISO 8675.

### Features and applications

Indexing plungers GN 817.2 match GN 817, they only differ from a longer knob.

Version C with rest position is used in such applications where the plunger must not protrude continually. In that case the knob is retracted and afterwards turned by 90°. A notch keeps the plunger in this position.
