

Stainless Steel-Knurled nuts

for Stainless Steel-Adjusting screws GN 827

SPECIFICATION

Stainless Steel AISI 304 **NG**
matte shot-blasted

INFORMATION

Stainless Steel-Knurled nuts GN 827.1 are used with Stainless Steel-Adjusting screws GN 827 (see page) to secure settings and positions in place by counterlocking.

For processing and assembly equipment on which attachments and mechanisms must be regularly exchanged, particularly simple adjustments can be achieved by combining adjusting screws GN 827 (see page), knurled nuts GN 827.1 and bearing blocks GN 828 (see page) of the types UA and UB to ensure that settings are retained even between uses.

TECHNICAL INFORMATION

- Stainless Steel characteristics (see page A26)

Application example

Adjusting screw GN 827 Knurled nut GN 827.1

Bearing blocks GN 828

GN 827.1

STAINLESS STEEL
