PEM® CAPTIVE PANEL SCREWS

PEM brand captive panel screws are designed to help keep parts to a minimum and eliminate risks associated with loose hardware that could fall out and damage internal components. These panel fastener assemblies are ideal to attach metal panels or other thin material components in applications where subsequent access will be necessary.

Types PF11/PF12/PF11M/PF12M self-clinching panel screws - PAGE 5		Type PFC2P recessed-head captive panel screws - PAGE 15

PEM® TYPE PF11™/PF12™ CAPTIVE PANEL SCREWS

The PEM® Type PF11/PF12 family of panel fasteners provide design flexibility by offering three styles of installation types, each having the same profile or look above the sheet or panel into which it is installed. The various mounting types include self-clinching, flare-mounted, and floating styles. Each offers a distinct advantage depending on your application. The standard selection of knobs include knurled or smooth metal caps and plastic PEM C.A.P.S.® (colored access panel screws). Cap selection is dependent upon your service access and/or color requirements.

Self-clinching Flare-mounted Floating

Key features include:

- 1) Universal Phillips/slot drive (except for plastic cap).
- 2) Shoulder on retainer to provide positive stop during installation.
- 3) Anti cross-threading feature. Eases assembly, aligns components, improves assembly line productivity, prevents jamming, and slides through clogged internal threads.

1 Universal
Phillips/
slot
drive*

2 Shoulder
on
retainer

3 ANTI CROSS-THREAD TECHNOLOGY - HOW IT WORKS

PennEngineering is a licensee for MATHread® technology, a registered trademark of MATHread Inc.

* Plastic cap version has Phillips drive only.

Standard Mounting Styles:

Self-clinching

- Installs flush on back side of panel.
- Available in three screw lengths.

Flare-mounted

- Appropriate for close centerline-to-edge applications.
- Doesn't require high installation force.
- Installs into any panel hardness.
- Installs flush on back side of panel.
- Can be installed into most any thin material.
- Appropriate for painted panels.

Flare-mounted, Floating

- Compensates for mating hole misalignment.
- Installs into any panel hardness.

Standard Cap Selection:

Metal Cap knurled

All metal cap available with knurls.

Metal Cap Un-knurled

All metal cap available without knurls.

Black Metal Cap

DuraBlack™ finish is scratch resistant. Finish is on both metal cap and screw. (finish code "BL")

Plastic Cap

Available with custom color plastic cap. (See page 8 for colors)

Available Drive Configurations:

PF11
Phillips/slot
(Standard -
except for plastic cap)

(Optional)

PEM® TYPES PF11™/PF12™/PF11M/PF12M CAPTIVE PANEL SCREWS

Type PF11
Knurled Cap
Patented

Type PF12
Smooth Cap

Dimples on head designate metric thread.

Phillips driver size.
(See chart)

Min. Radial Float - .020" / 0.51 mm total.

Threads:

External, ASME B1.1, 2A / ASME B1.13M, 6g

Material:

Knob: Aluminum
Retainer: Heat-treated Carbon Steel
Screw (Type PF11/PF12): 400 Series Stainless Steel
Screw (Type PF11M/PF12M): Heat-treated Carbon Steel ⁽¹⁾
Spring: 300 Series Stainless Steel

Finish:

Knob: Natural Finish
Retainer: Bright nickel over copper flash per ASTM B689
Screw (Type PF11/PF12): Passivated and/or tested per ASTM A380
Screw (Type PF11M/PF12M): Zinc plated, 5µm, colorless ⁽³⁾

Optional Finish (BL):

Knob: Black anodize ⁽²⁾
Screw: Black nitride ⁽²⁾

For use in sheet hardness:

HRB 80 or less (Hardness Rockwell "B" Scale) / HB 150 or less (Hardness Brinell)

PEM® C.A.P.S.® CAPTIVE PANEL SCREWS

Color Capabilities ⁽¹⁾

Choose a knob color code and add it to the end of the base part number.

Patented.

Black = B
(Standard)

Dimples on head designate metric thread.

Min. Float - .020" / 0.51 mm total.

Installation Data page 26. Performance Data page 34.

Threads:

External, ASME B1.1, 2A /
ASME B1.13M, 6g ⁽²⁾

Material:

Knob: PC/ABS (UL 94V-0, halogen-free) ⁽³⁾
Retainer: Heat-treated Carbon Steel
Screw: Heat-treated Carbon Steel
Spring: 300 Series Stainless Steel

Finish:

Retainer: CN - Bright nickel over
copper flash per ASTM B689
Screw: Zinc plated, 5µm, colorless ⁽⁴⁾

For use in sheet hardness:

HRB 80 or less (Hardness Rockwell "B" Scale)
HB 150 or less (Hardness Brinell)

PART NUMBER DESIGNATION

Also available with flare-mounted retainer as Type PF11PMF or with floating style retainer as Type PF11PMW.

All dimensions are in inches.

(1) The colors shown (except for black) are non-stocked standards and available on special order. Since actual color knob may vary slightly from those represented, we recommend that you request samples for color verification. If you require a custom color or you need a "color matched" knob, please contact us.

(2) As with all Class 2A/6g external threads with an additive finish, the maximum major and pitch, after plating, may equal basic sizes and be gauged to Class 3A/4h, per ANSI B1.1, Section 8, Table 3A and ANSI B1.13M, Section 8, Paragraph 8.2.

(3) Temperature limit is 210° F / 99° C.

(4) See PEM Technical Support section of our web site (www.pemnet.com) for related plating standards and specifications.

PEM® TYPE PFHV™ CAPTIVE PANEL SCREWS

- Low cost captive screw design to replace loose hardware.
- Small, compact and low profile design for limited access areas.
- Two screw lengths.
- Universal slot/Phillips recess standard.
- Available with MATHread® anti cross-thread technology. (See page 4 for more information).
- Available with Torx® recess.

Patented

Threads: External, ASME B1.1, 2A / ASME B1.13M, 6g ⁽¹⁾
Material: Retainer: Carbon Steel Screw: Heat-treated Carbon Steel
Finish: Retainer: CN - Bright nickel over copper flash per ASTM B689 Screw: CN - Bright nickel over copper flash per ASTM B689 ⁽¹⁾
For use in sheet hardness: HRB 60 or less (Hardness Rockwell "B" Scale) HB 107 or less (Hardness Brinell)

PEM® TYPES PF7M™/PF7MF™ CAPTIVE PANEL SCREWS

- Small, compact and low-profile design for limited access areas.
- MATHread® anti cross-thread technology. (See page 4 for more information).
- Installs flush on back side of panel.
- Type PF7M Self-clinching mounting design provides high pushout resistance.
- Type PF7M does not require special hole preparation.
- Type PF7MF is appropriate for close centerline-to-edge applications.
- Type PF7MF does not require high installation force.
- Type PF7MF installs into any panel hardness.
- Available with Torx® recess.

PEM® TYPES PFC4™/PFC2P™ CAPTIVE PANEL SCREWS

- Types PFC4/PFC2P have fully concealed-head for tool only access.
- Types PFC4/PFC2P comply with UL 60950 standards.
- Type PFC4 installs into stainless steel sheets HRB 88 or less.
- Types PFC4/PFC2P are available with MATHread® anti cross-thread technology. (See page 4 for more information).
- Types PFC4/PFC2P available with Torx® recess.

TYPE PFC4™ RECESSED-HEAD CAPTIVE PANEL SCREWS

(1) As with all Class 2A/6g external threads with an additive finish, the maximum major and pitch, after plating, may equal basic sizes and be gauged to Class 3A/4h, per ANSI B1.1, Section 8, Table 3A and ANSI B1.13M, Section 8, Paragraph 8.2.

(2) The blue plastic retaining rings are a PEM trademark. The temperature limit is 200° F / 93° C.

PEM® TYPES PTL2/PSL2 SPRING-LOADED PLUNGER ASSEMBLIES

- Used as positioning pins for sliding components such as drawer slides and equipment consoles.
- Fast installation and removal of components.
- Reverse side of sheet is flush when plunger is retracted.
- Type PTL2 has quick lockout feature to hold plunger in fully retracted position.
- For use in sheets of HRB 80 or less.
- Available as Type PSL2 without lockout feature on special order.

Type PTL2/PSL2 installed and with mating panel.

Lockout feature holds plunger in retracted position. Simply retract and twist to engage lockout feature.

Shoulder provides positive stop during installation.

Material:

Plunger: Heat-treated Carbon Steel
Retainer: Heat-treated Carbon Steel

Finish:

Plunger: CN - Bright nickel over copper flash per ASTM B689
Retainer: CN - Bright nickel over copper flash per ASTM B689

For use in sheet hardness:

HRB 80 or less (Hardness Rockwell "B" Scale)
HB 150 or less (Hardness Brinell)

PEM® TYPES SCBR™/SCB™/SCBJ™ CAPTIVE PANEL SCREWS

- Permanently captivates into sheets as thin as .040" / 1.02 mm and greater.
- Lowest cost captive screw design to replace loose hardware.
- Available with self-retracting (Type SCRB), axial float (Type SCB), or jacking feature (Type SCBJ).
- Appropriate for close centerline-to-edge applications.

(1) 2B (unified) and 6H (metric) go gauge may stop at pilot end but class 3A (unified) and 4h (metric) screws will pass through with finger torque.

(2) See PEM Technical Support section of our web site (www.pemnet.com) for related plating standards and specifications.

(3) Also available on special order Type F10 self-clinching floating receptacle nuts.

REELFAST® SMT PANEL SCREW COMPONENTS AND ASSEMBLY DATA

- Retainer installed using conventional surface mount techniques.
- Simply snap screw into retainer to complete assembly.
- Black ABS knob standard.
- Optional molded-thru colors available.
- Available with Torx® recess.

Threads: External, ASME B1.1, 2A / ASME B1.13M, 6g ⁽¹⁾
Material: Knob: ABS ⁽²⁾ Retainer: Carbon Steel Screw: Carbon Steel
Finish: Retainer: ET - Electro Plated Bright Tin ASTM B545, Class B with Preservative coating (standard) DT - Matte Electro-tin ASTM B545, Class A with Preservative Coating, Annealed (optional) Screw: CN - Bright nickel over copper flash per ASTM B689

Performance Data page 38.

All dimensions are in inches.

- (1) As with all Class 2A/6g external threads with an additive finish, the maximum major and pitch, after plating, may equal basic sizes and be gauged to Class 3A/4h, per ANSI B1.1, Section 8, Table 3A and ANSI B1.13M, Section 8, Paragraph 8.2.
- (2) Temperature limit is 200° F / 93° C.

Color Capabilities

Choose a knob color code and add it to the end of the standard part number.

The colors shown (except for black) are non-stocked standards and available on special order. Since actual color knob and retainer may vary slightly from those represented, we recommend that you request samples for color verification. If you require a custom color or you need a "color matched" knob or retainer, please contact us.

CAPTIVE PANEL SCREW CAPABILITIES

RECOMMENDED USES OF PEM® CAPTIVE PANEL SCREWS

Installation into			
Stainless Panels	Painted Panels	P.C. Boards	Non-ductile Materials
PFC4 	PF11MF 	SMTPF 	PF11MW 
PF11MF 	PF7MF 	PF11MW 	PFK 
PF11MW 		PFK 	PF11MF 
PF7MF 			PF7MF 

VALUE-ADDED CAPABILITIES

Heat Sink Fastening Solutions	ATCA Solutions	Tight Seal Solutions
 <p>Captivated screw and spring eliminate loose hardware, and when used with the mating nut or standoff will provide accurate and reliable clamp loads, while preventing damage to P.C. Board.</p>	 <p>Use Type PF11PM captive panel screw and Type TPXS pin in conjunction to satisfy the requirements of the PICMG 3.0 of the Advanced TCA®.</p>	 <p>Consider adding an o-ring to our PEM C.A.P.S.® captive panel screw. When fastened, it provides a tight seal above the panel.</p>
Washer Locking Feature	Nylon Locking Patch	Thread-forming Opportunity
 <p>Consider a modified Type PF7MF with integrated split washer for applications requiring a high cycle lockout feature. And it prevents loosening due to vibration.</p>	 <p>Nylon locking patch is available to be added to any of PEM captive panel screws for applications requiring a locking element. And it prevents loosening due to vibration.</p>	<p>PennEngineering named official licensee for TRILOBULAR™ and REMFORM® fastener products. Both proprietary thread-forming fastener families are designed to promote lower overall assembly costs. Contact us to learn more.</p> <p>E-mail us at: techsupport@pemnet.com.</p>

CAPTIVE PANEL SCREW INSTALLATION ⁽¹⁾

TYPE PF11/PF12/PF11M/PF12M/PEM C.A.P.S.[®]

1. Prepare properly sized mounting hole in sheet. Do not perform any secondary operations such as deburring.
2. Place fastener into recessed anvil, and place workpiece (preferably the punch side) over shank of fastener.
3. With punch and anvil surfaces parallel, apply squeezing force until the shoulder of the retainer comes in contact with the sheet material.

(1) Punches and anvils should be hardened.

CAPTIVE PANEL SCREW INSTALLATION

TYPE PF11MW/PF12MW

1. Prepare properly sized mounting hole in sheet.
2. Place fastener into recessed anvil, place workpiece over shank of fastener, then place the washer over the shank of the fastener.
3. With punch and anvil surfaces parallel, apply squeezing force with flaring punch.

Installation Tooling

CAPTIVE PANEL SCREW INSTALLATION

TYPE PFC4

1. Prepare properly sized mounting hole in sheet. Do not perform any secondary operations such as deburring.
2. Place fastener into recessed anvil, and place workpiece (preferably the punch side) over shank of fastener.
3. With punch and anvil surfaces parallel, apply squeezing force until the shoulder of the retainer comes in contact with the sheet material.

Installation Requirements

1. Sheet hardness must be less than 88 on the Rockwell "B" scale.
2. Hole punch should be kept sharp to minimize work hardening around hole.
3. Fastener should be installed in punch side of hole.
4. Fastener should not be installed near bends or other highly cold worked areas where sheet hardness may be greater than 88 on the Rockwell "B" scale.

CAPTIVE PANEL SCREW INSTALLATION

TYPE SCBR

1. Prepare properly sized mounting hole in sheet. Do not perform any secondary operations such as deburring. If the hole is punched, be sure to install fastener into punched side of hole.
2. Assemble spring on screw by rotating spring counter clockwise and position assembly into recessed magnetic punch.
3. Position hole in workpiece over retractable anvil pin.
4. With punch and anvil surfaces parallel, apply squeezing force on top of the screw head and the underside of the sheet material. The squeezing action forces the displacer of the screw into the sheet, causing it to reduce the mounting hole diameter and captivate the screw.

Installation Tooling

UNIFIED	Thread Code	Installation Tooling Dimensions (in.)			Anvil Part Number	Magnetic Punch Part Number (1)
		C	J	K		
	440	.113 - .116	.354 - .357	.035	970200006300	8016210

	M4	4.03 - 4.11	10.8 - 10.9	0.89	970200019300	8016214

(1) Pneumatic punch may also be used. Please contact our PEMSERTER tooling division for punch part numbers.

TYPE SCB/SCBJ

1. Prepare properly sized mounting hole in sheet.
2. Place the fastener through mounting hole (preferably the punch side) and into anvil. A flat or recessed punch can be used.
3. With punch and anvil surfaces parallel, apply squeezing force to the top of the screw head and the underside of the sheet material. The squeezing action forces the shoulder of the screw into the sheet, displacing sheet material, causing it to fill the void under the head and shoulder of the screw.

CAPTIVE PANEL SCREW INSTALLATION

TYPE PR10

1. Prepare properly sized mounting hole in sheet. Do not perform any secondary operations such as deburring.
2. Place fastener into the mounting hole (preferably the punch side).
3. With punch and anvil surfaces parallel, apply squeezing force until the retainer is flush in the sheet.

TYPE N10

1. Prepare properly sized mounting hole in sheet. Do not perform any secondary operations such as deburring.
2. Place fastener into recessed anvil, and place workpiece (preferably the punch side) over shank of fastener.
3. With punch and anvil surfaces parallel, apply squeezing force until the shoulder of the nut comes in contact with the sheet material.

	SCB / SCBJ	M4	1.7	5700	10	1000	17	1150

TYPE PR10

UNIFIED	Type	Thread Code	Test Sheet Material	
			Aluminum	Cold-Rolled Steel
			Installation (lbs.)	Installation (lbs.)
	PR10	440	2100	3000
		632	2100	3000
		832	2100	3600
		032	2400	4200

METRIC	Type	Thread Code	Test Sheet Material	
			Aluminum	Cold-Rolled Steel
			Installation (kN)	Installation (kN)
	PR10	M3	9.3	13.3
		M4	9.3	16
		M5	10.7	18.7

(1) Unless specified, performance values reported are averages when all installation specifications and procedures are followed. Variations in mounting hole size, sheet material and installation force will affect results. Performance testing of this product in your application is recommended. We will be happy to provide samples for this purpose.

(2) Torque values shown will produce a preload of 70% minimum tensile (125 ksi / 935 MPa) with nut factor "k" equal to .1

CAPTIVE PANEL SCREW PERFORMANCE DATA⁽¹⁾

TYPE N10

REELFAST® TYPE SMTPR RETAINER⁽²⁾

Part Number	Test Sheet Material	
	.062" Single Layer RF-4	
	Pushout (lbs.)	Pushout (N)
SMTPR-6-1ET	161.4	718

TESTING CONDITIONS

Oven Quad ZCR convection oven with 4 zones
High Temp 518°F / 270°C
Board Finish 62% Sn, 38% Pb
Screen Printer Ragin Manual Printer
Vias None

Spokes 2 Spoke Pattern
Paste Amtech NC559LF Sn96.5/3.0Ag/0.5Cu (SAC305) - Lead-free
Stencil .0067" / 0.17mm thick

TYPE PFK

UNIFIED	Type	Thread Code	Test Sheet Material	
			FR-4 Fiberglass	
			Installation (lbs.)	Pushout (lbs.)
PFK	440	250	55	
	632	400	60	

METRIC	Type	Thread Code	Test Sheet Material	
			FR-4 Fiberglass	
			Installation (kN)	Pushout (N)
PFK	M3	1.1	245	

(1) Performance values reported are averages when all installation specifications and procedures are followed. Variations in mounting hole size, sheet material and installation force (or swaging force for Type PF11MW) will affect results. Performance testing of this product in your application is recommended. We will be happy to provide samples for this purpose.

(2) With lead-free paste. Average values of 30 test points. The data presented here is for general comparison purposes only. Actual performance is dependent upon application variables. We will be happy to provide samples for you to install. If required, we can also test your installed hardware and provide you with the performance data specific to your application.

PEM® FASTENER IDENTIFICATION AND TRADEMARKS

To be sure that you are getting genuine PEM® brand fasteners, look for the unique PEM product markings and identifiers.

These panel fastener styles are protected by U.S. patents:

No. D400,430

No. D437,209S

No. 6,814,530

No. 5,256,019

No. D656,392S

No. D603,693S
